ALIGNING BUSINESS ARCHITECTURE & ENTERPRISE ARCHITECTURE FRAMEWORKS

WHY DO IT?

PERSPECTIVE
Provide a complete business and IT perspective to issue analysis and cost/benefit analysis.
03

INTEGRATION
Integrate all aspects of strategic analysis and planning through solution deployment.
02

ALIGNMENT
Align multiple disciplines across the business and technology teams to maximize investments while optimizing value.
04

FOCUS
Bring a robust, business-centric focus to the discipline of enterprise architecture.
01

HOW TO DO IT?

SUBJECT AREAS
Describes architecture in terms of the subjects (typically called domains) that it covers. In general, each domain can be decomposed into more detailed subject areas.
01

METHODS
Describes architecture in terms of the activities that are performed by architects to produce the artifacts specific to each domain.
03

ARTIFACTS
Describes architecture in terms of the blueprints that are produced.
02

s2e transformation

Reconcile and align your business architecture framework (the BIZBOK® Guide) with your organization's enterprise architecture framework across the following areas.
